#### **DETAILED ACTION**

#### Priority

Receipt is acknowledged of papers submitted by the International Bureau under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### **Drawings**

The drawings were received on 28 February 2006. These drawings are approved by the Examiner.

#### Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION: Add a new paragraph at page 1, after the title and insert new section headings and subheadings as follows:

#### CROSS REFERENCE TO RELATED APPLICATION

This application is a U.S. National Stage Filing under 35 U.S.C. 371 from International Application No. PCT/JP04/12585 filed August 25, 2004, which claims the benefit under Japanese Patent Application No. 2003304271 filed August 28, 2003.

# Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest a conjugate fiber having an alternating laminated section with a thickness of no greater than 10 µm, wherein alkali-insoluble polymer layers with different refractive indices are alternately laminated parallel to the long axis direction of the flat cross-section and the ratio (SP ratio) between the solubility parameter value of the higher refractive index polymer (SP 1) and the solubility parameter value of the lower refractive index polymer (SP2) is in the range of 0.8 < SP1/SP2 < 1.1, is covered with an alkalisoluble polymer with a thickness of 2.0 pm or greater. More specifically, the prior art does not disclose the alternating laminated layers to be an alkali-insoluable polymer layer and the fiber to be covered with an alkali-soluable polymer.

A close prior art of record is commonly owned and assigned U.S. Patent 6,430,348 to Asano et al. Asano et al teaches a similar configuration of alternating laminate sections, however, Asano et al does not teach the alternating laminate sections to be an alkali-insoluable polymer layer and the fiber to be protectively covered with an alkali-soluable polymer. To the contrary, Asano et al teaches the alternating laminate sections to be formed from a dibasic base having at least one alkyl group with alkali-soluable (not insoluable) polymers. Furthermore, Asano et al does not teach the protective layer to be an alkali-soluable polymer.

Therefore, claims 1-20 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Application/Control Number: 10/569,965

Art Unit: 2874

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. None of the documents cited by the Examiner discloses or reasonably suggests the allowable subject matter discussed above.

The documents submitted by applicant in the Information Disclosure Statement have been considered and made of record. Note attached copy of form PTO-1449. None of the references submitted by Applicant discloses or reasonably suggest the allowable subject matter discussed above.

## Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tina M. Wong whose telephone number is (571) 272-2352. The examiner can normally be reached on Monday-Friday 8:30-5:30.

Application/Control Number: 10/569,965
